Any deficiency resulting from a minor informality may be cured or waived at the sole discretion of the Procurement Official.

(d) Unbalanced Bidding. The District may reject an Offer as non-responsive if the prices bid are materially unbalanced between line items or sub-line items. A bid is materially unbalanced when it is based on prices significantly less than cost for some work

and prices which are significantly overstated in relation to cost for other work, and if there is a reasonable doubt that the bid will result in the lowest overall cost to the District even though it may be the low evaluated bid, or if it is so unbalanced as to be tantamount to allowing an advance payment.

If your response or any part thereof, is improperly marked as confidential or trade secret or protected, the District may, in its sole discretion, determine it non-responsive. If only portions of a page are subject to some protection, do not mark the entire page. By submitting a response to this solicitation or request, Offeror (1) agrees to the public disclosure of every page of every document regarding this solicitation or request that was submitted at any time prior to entering into a contract (including, but not limited to, documents contained in a response, documents submitted to clarify a response, and documents submitted during negotiations), unless the page is conspicuously marked "TRADE SECRET" or "CONFIDENTIAL" or "PROTECTED", (2) agrees that any information not marked, as required by these bidding instructions, as a "Trade Secret" is not a trade secret as defined by the Trade Secrets Act, and (3) agrees that, notwithstanding any claims or markings otherwise, any prices, commissions, discounts, or other financial figures used to determine the award, as well as the final contract amount, are subject to public disclosure. In determining whether to release documents, the District will detrimentally rely on Offeror's marking of documents, as required by these bidding instructions, as being either "Confidential" or "Trade Secret" or "PROTECTED". By submitting a response, Offeror agrees to defend, indemnify and hold harmless the District, its Officials and employees, from every claim, demand, loss, expense, cost, damage or injury, including attorney's fees, arising out of or resulting from the District withholding information that Offeror marked as "confidential" or "trade secret" or "PROTECTED". The surface of the sub base shall then be treated as a delaminated area above, with a minimum 3" perimeter of the surface to be excised and reapplied to the surface level of the surrounding resilient track coating. All patching and repairs must be agreed and approved by the District prior to commencement of work.

JOINT REINSPECTION

After all worn and delaminated areas have been patched and repaired, the Owner and the Contractor shall conduct another joint inspection to verify completion of repairs and approve the Contractor to proceed with entire track resurfacing.

RESILIENT SURFACE INSTALLATION

Primer shall be applied to the entire surface at a rate not to exceed 0.10 gal per SY followed by application of the granules and binder in accordance with the material supplier's instructions. The granules and binder shall be applied in a minimum of two lifts to achieve a uniform surface of not less than the overall thickness of 1/2" (combined thickness of existing and new materials). The binder shall be uniformly distributed with the granules at the rate of 1 gallon per 16 lbs. of granules, or the manufacturer's specifications.

Upon completion of the resilient surface installation, the Contractor shall test for the required depth using the SMG FT 3 Floor Tester Depth gauge. Tests shall be performed in the presence of the Owner. The test shall be conducted at least 100 locations on the running track, at various locations covering the outer lane, the inner lane, the center of the oval, and other random sites to ensure comprehensive coverage. All of the tests must meet the required depth, any areas that fall short will have additional layers of rubber and binder applied until the required depth is met. The Owner reserves the right to request additional tests near any test site that does not meet the required depth in order to determine the extent of the area of deficiency.

MEASUREMENT AND PAINTING

Painting shall not commence until the final layer of resilient surface has been applied, the amount of time proscribed by the manufacturer has elapsed, and accurate finished measurements have been taken.

The measurements shall proceed as follows:

1. Locate and establish all radius points

6. Establish all location on the curves using a Transit or Theodolite capable of reading direct to 20 seconds.

8. Paint all of the large, 3' high, lane numbers in two (2) colors, utilizing shadowed backgrounds.
9. All lines shall receive sufficient paint to assure complete opacity and uniformity of color.
10. Paints shall be used directly from original containers and shall be thinned only when hot temperatures dictate thinning for smooth applications

11. Amount of paint used shall be recommended by the manufacturer

12. All measurement shall be made by competent, experienced, and fully qualified personnel.

13. Upon completion of the track lines and markings, the Contractor shall provide the Owner with a letter certifying that all track lines and measurements conform to the National Federation of High School Sports Associations requirements. Accompanying the letter shall be a drawing of all markings, measure points, dimensions, and any necessary calculations needed to demonstrate finished track and markings conform to the referenced standard. All documents shall be signed by the entity supervising the layout and striping.

14. The markings shall include all events and marks required or recommended by the NFHS, the NCAA, or the I.A.A.F.

CLEAN UP AND CLOSE OUT

Upon completion of the work, the Contractor shall remove all containers, any surplus materials not claimed by the Owner, and any other project debris. Landscaping and other site structures and features shall be restored to their pre project conditions. The site shall be left in a clean, orderly manner acceptable to the Owner.

SURVEY AND ASBA CLASSIFICATION APPLICATION

At the appropriate stage during the work, the Contractor shall designate a qualified third party surveyor to perform the Track Classification Survey and complete the application form. The survey shall be scheduled with the Owner and the Owner reserves the right to be present at the survey. Completed forms are to be copied to the Owner and filed appropriately.

SURFACE PROTECTION EQUIPMENT

Protective mats shall be supplied to the Owner for use by student athletes utilizing the track for non-Track and Field related activities or crossing the track routinely to utilize the inner football field. The owner specifically requires two sets of mats for the Cheerleaders' performance area during football games and two sets of mats for each team of Football Players to walk across when traveling to the field and their respective benches.

FINAL INSPECTION

Prior to processing payment for this project, the Contractor and the Owner shall conduct a joint final inspection of the entire track facility at West Ashley High School in order for Owner to make final acceptance. The Owner may designate a qualified consultant to participate in this inspection, any preceding inspection, or any ad hoc inspection at any step of the project as well.

At the final inspection the contractor will provide the owner with electronic copies of the final "as built" drawings for the project, and track certification materials submitted for the track facility, two copies of the owner's manual which includes instructions for routine cleaning and maintenance and care, two copies of the warranty policies for the materials and workmanship, and one copy of the ASBA's Publication Running Tracks: A Construction and Maintenance Manual (2012) for the Owner's use and reference.

WARRANTY

The warranty period shall not commence until the Owner has provided the Contractor with written final acceptance of the work.

The track surface shall be fully warranted against defects in materials and workmanship for a period of not less than five years. The first two years of the warranty shall be backed by a TWO-YEAR MAINTENANCE BOND issued by a Treasury-listed surety. The manufacturer and/or installation contractor shall be advised in writing of any defects discovered during the warranty period. After notification, the owner shall take the necessary steps to limit further damage to the surface. The contractor shall respond within thirty (30) days of any notice of discovery of defects and shall make repairs, weather permitting within thirty (30) days of notification of defects. A written and notarized warranty shall be submitted with the final billing. The manufacturer and/or installation contractor shall provide the owner with a detailed roster of routing maintenance and care instructions.
