

BYOD Certificate Instructions

Chromebook Instructions

Step 1: Connect to Guest_CCSD Wireless Network, Select Staff/Student.

Step 2: Read and Accept Terms

Step 3: Enter your CCSD username and password, then press continue.

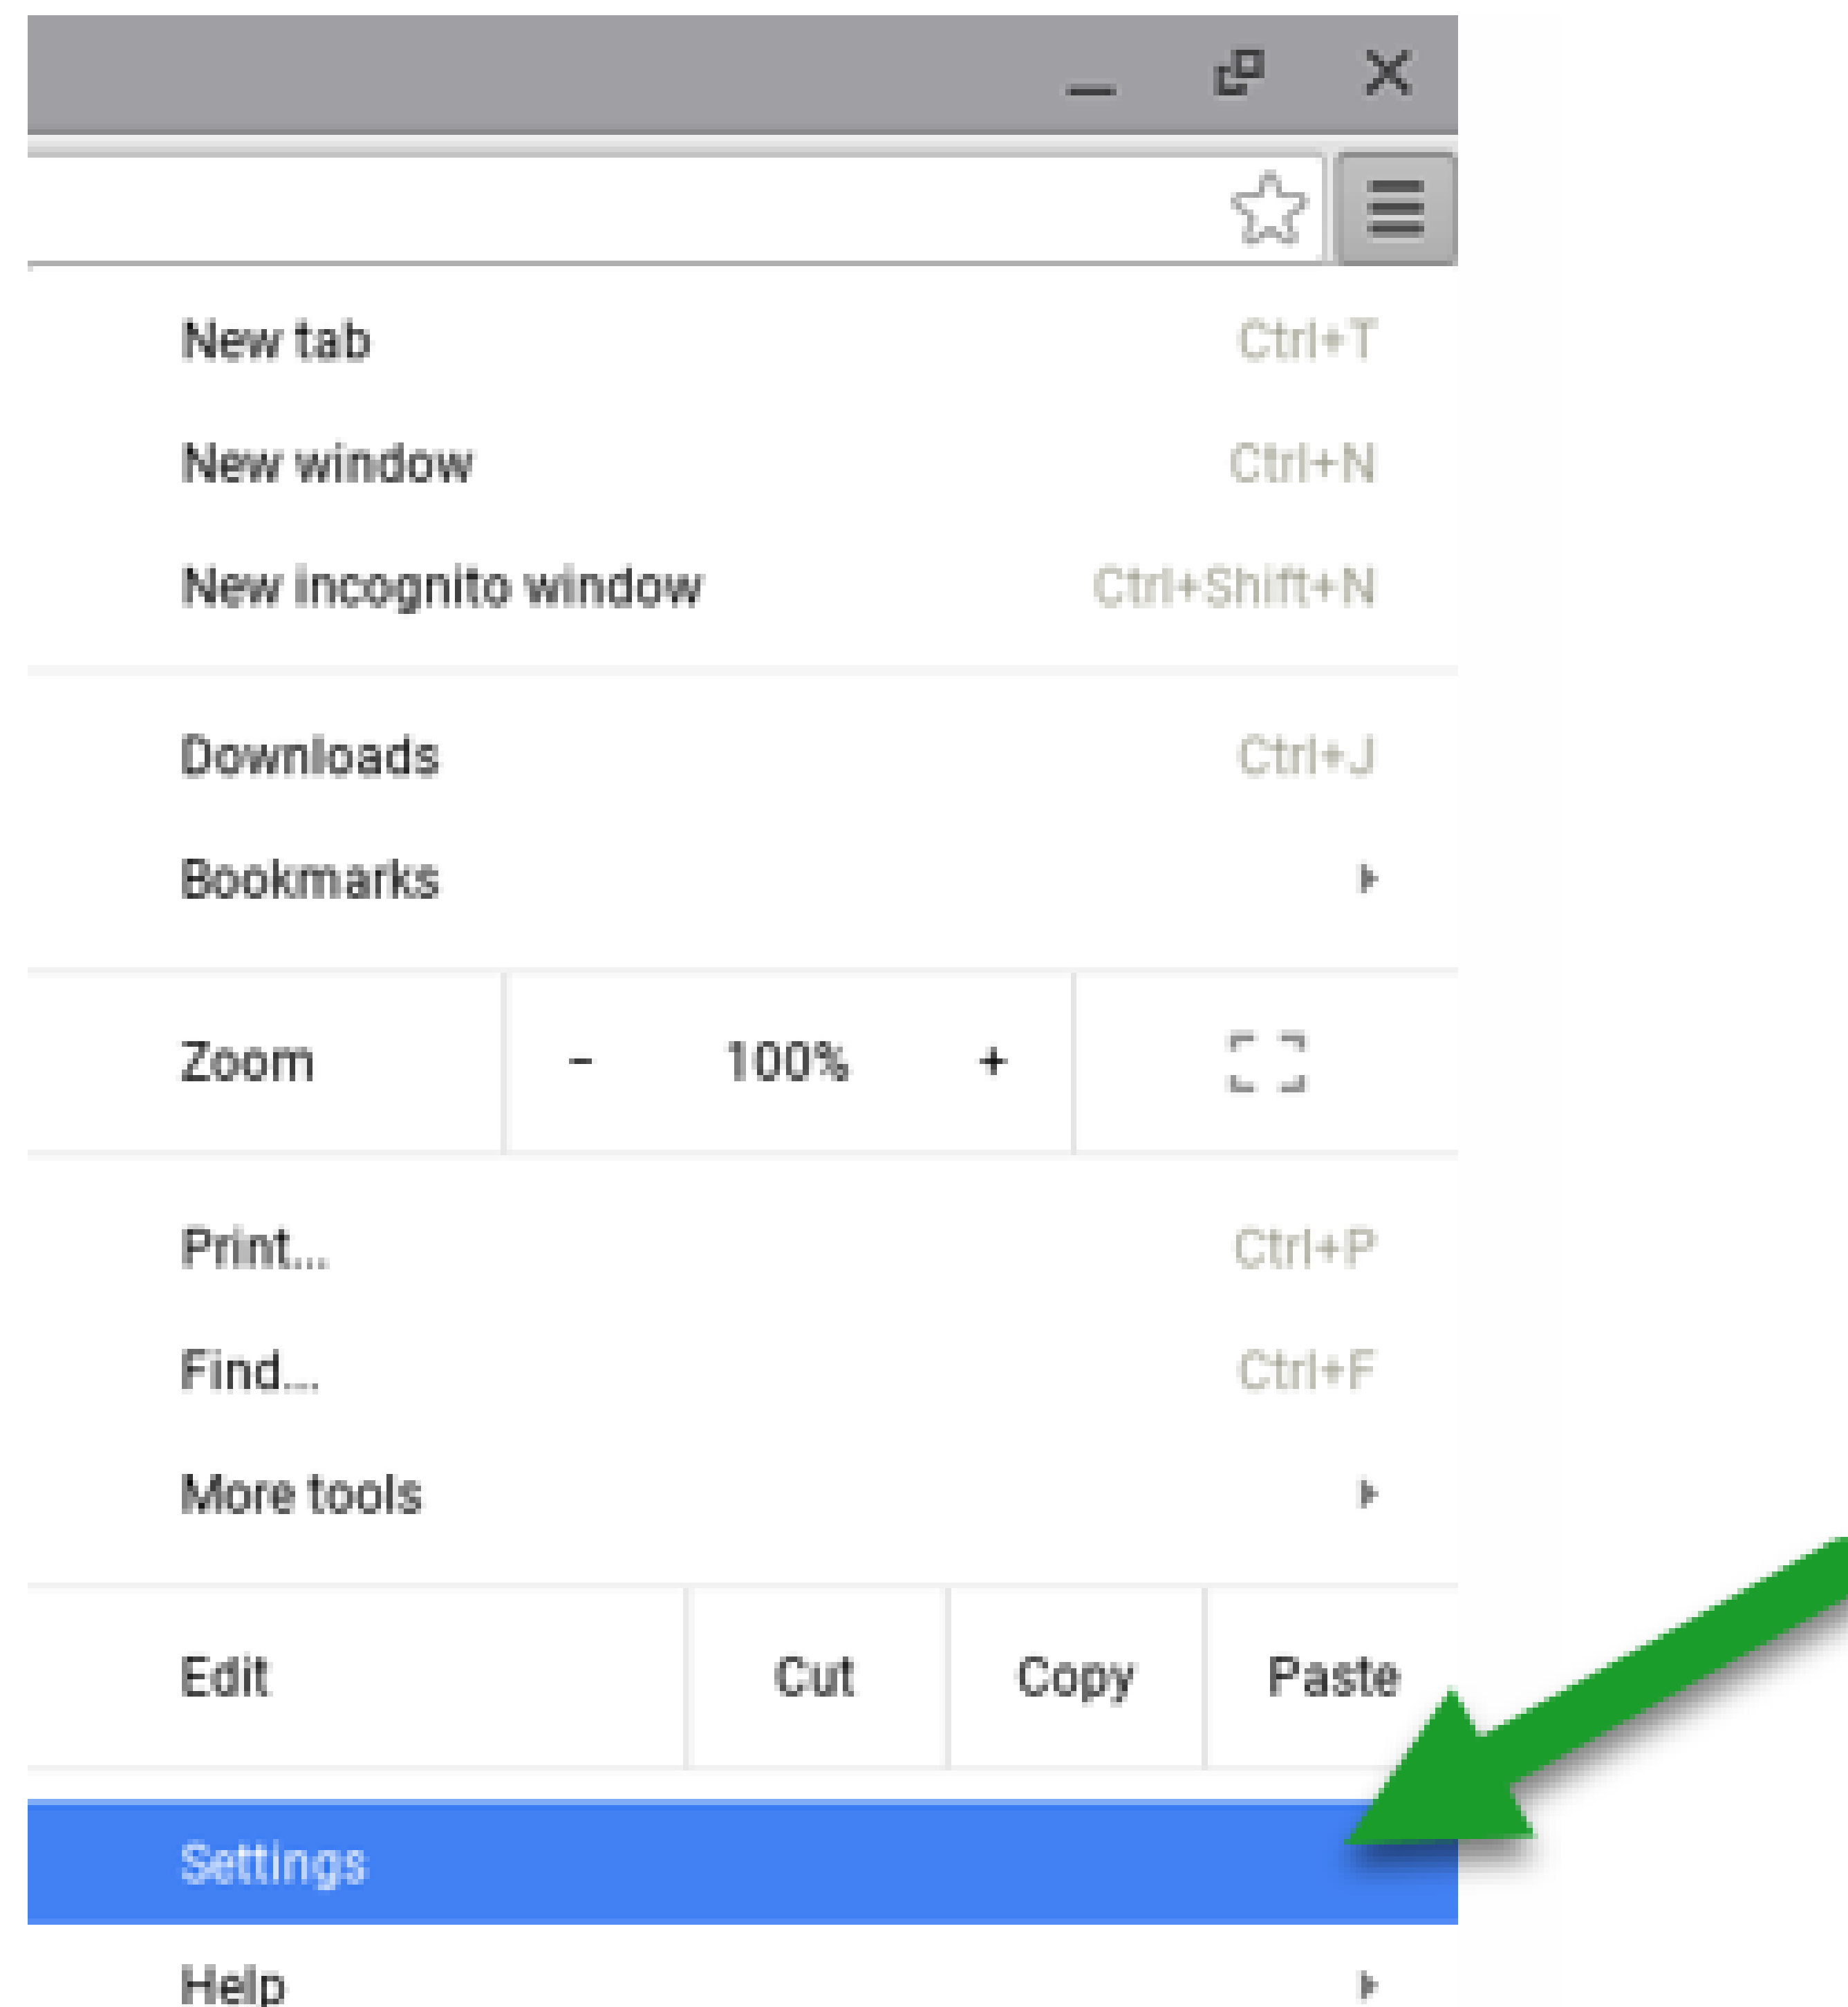

Step 4: Do not select Download Certificate. Scroll to the bottom of the next page and press **Continue**.

Step 5: Scan QR Code to download certificate or go to <http://iboss1-1/cert>

Step 6: Depending on your configuration, you may be prompted to save the certificate. If so, select a folder to save the file in, and then click **Save**. (In Chrome OS and some other configurations, the file may simply download immediately.)

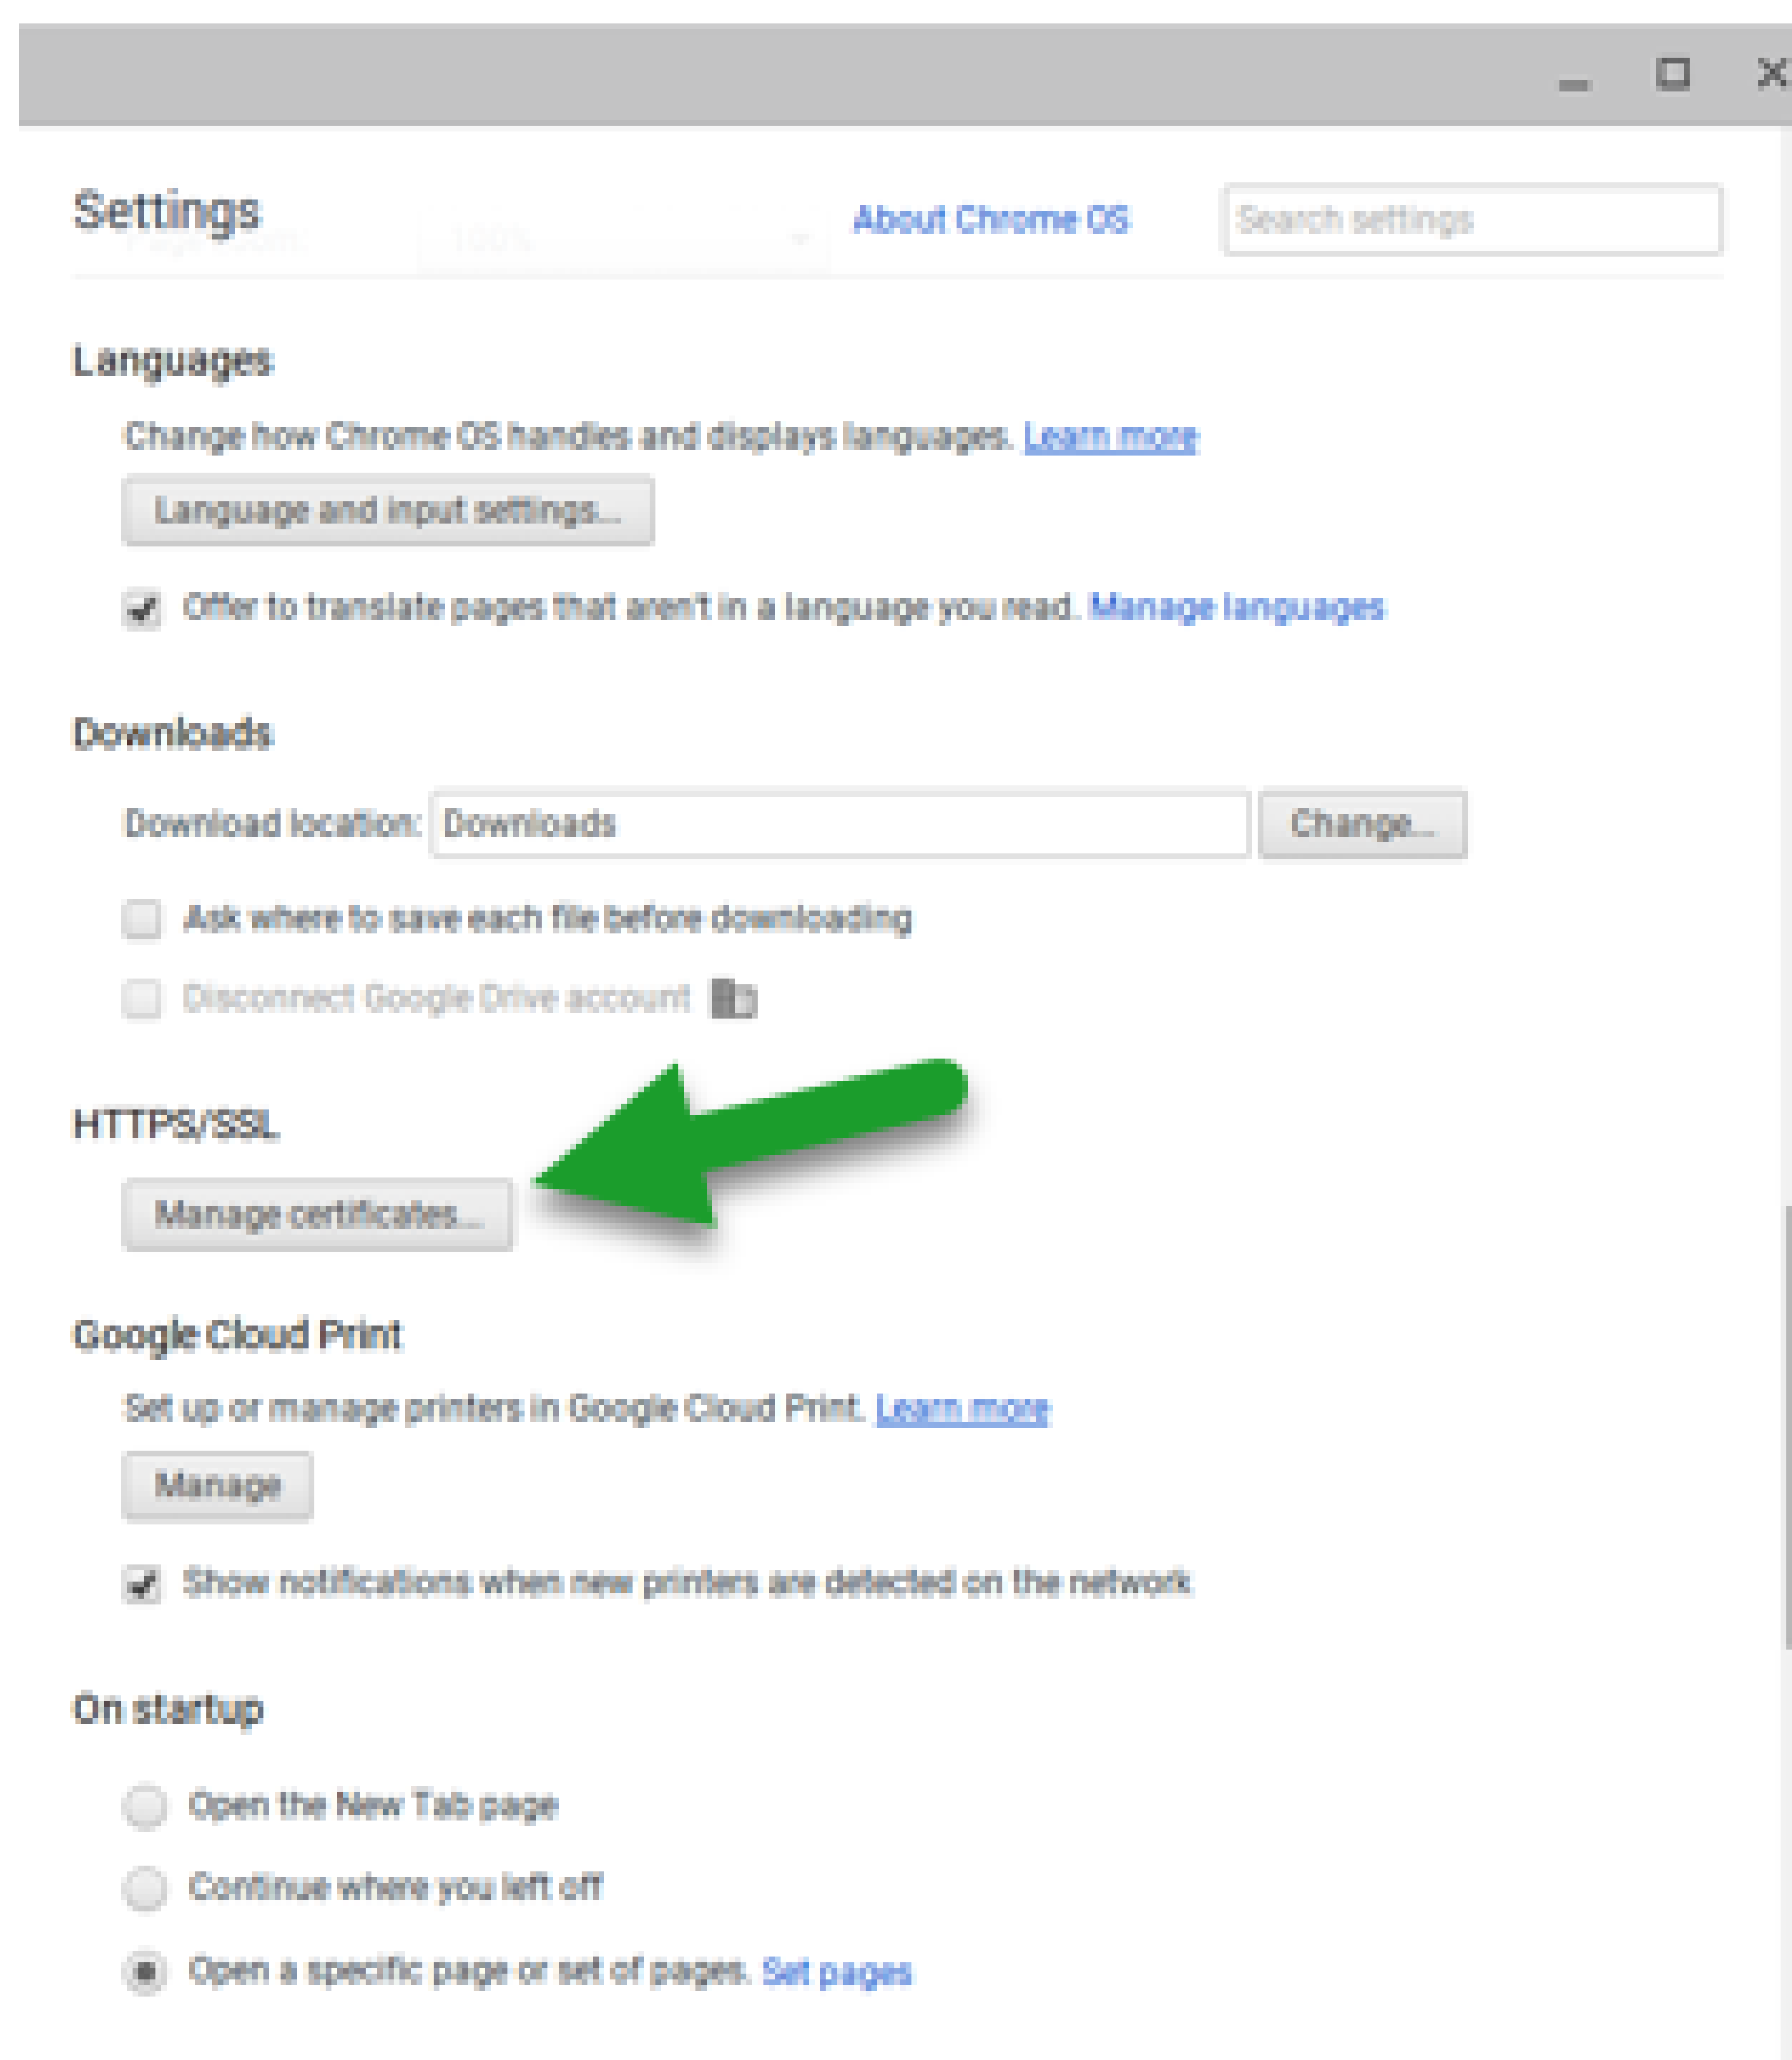

Step 7: Do not double-click the file after the download has finished; instead, click the Chrome menu (usually appearing as three horizontal lines) in the top right corner. Then, click the **Settings** option.

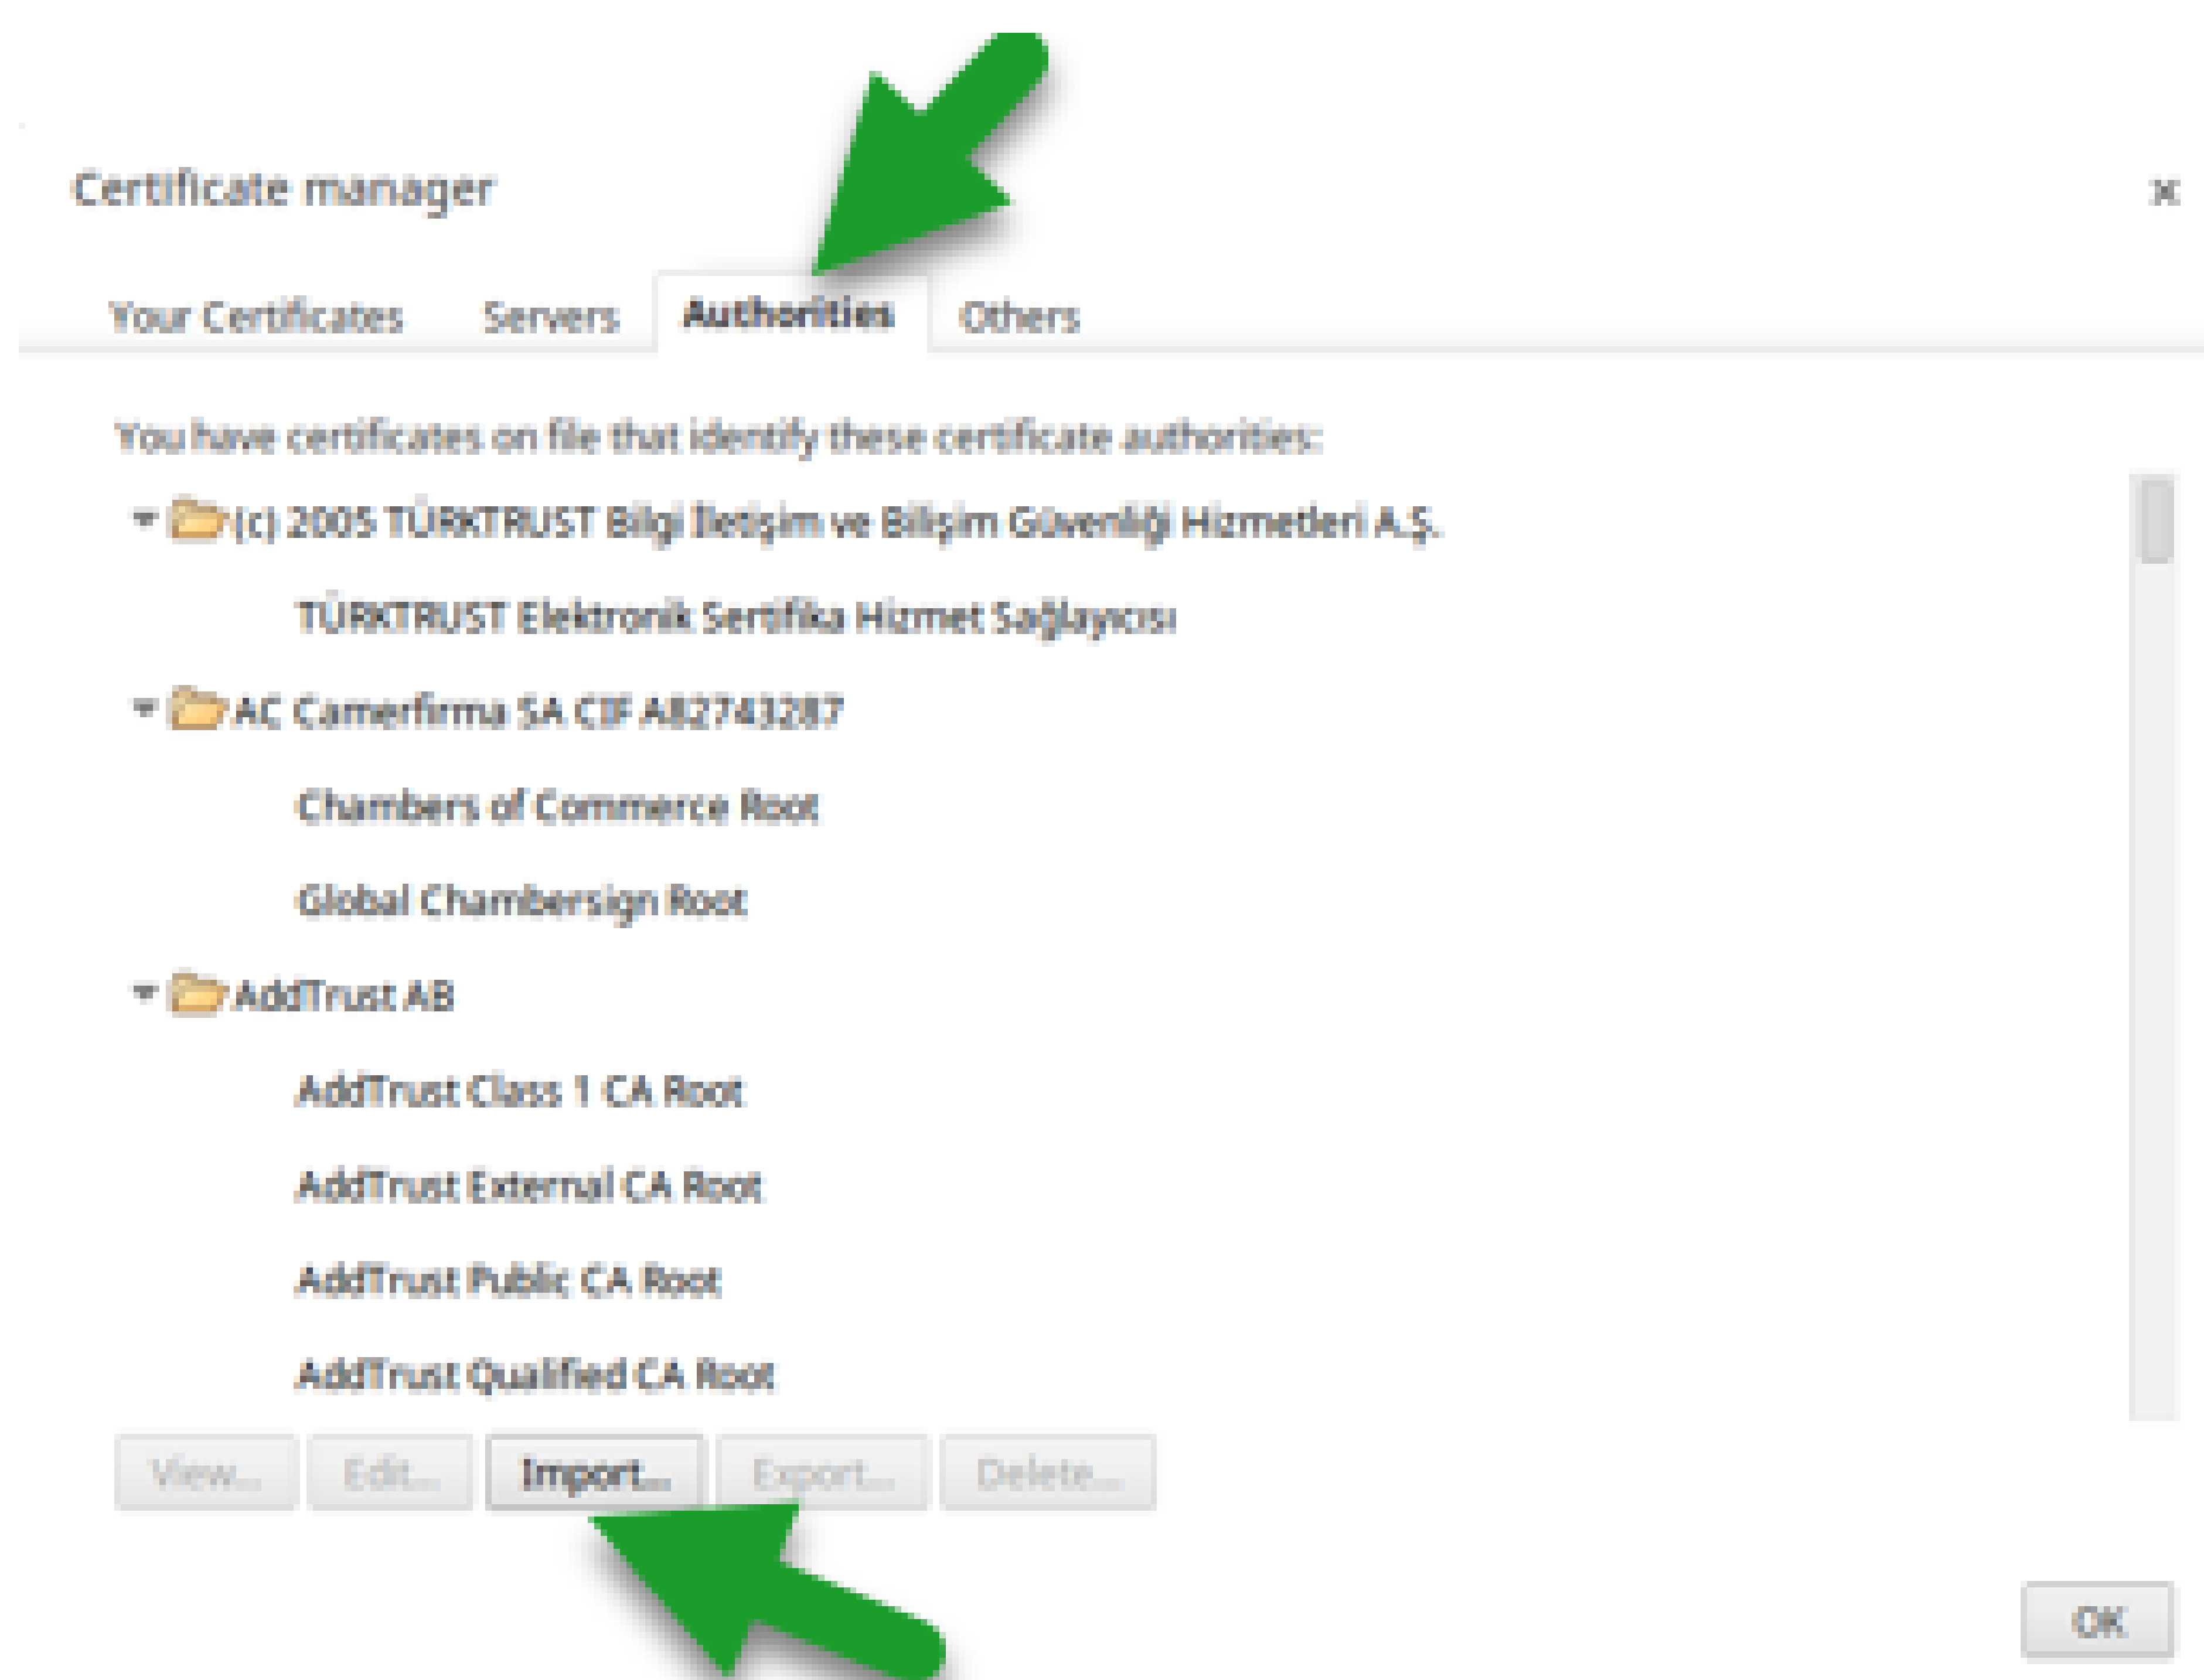

Step 7: The Chrome Settings page will open in a new tab. If necessary, scroll all the way down to the bottom; then, click the **Show advanced settings** link.

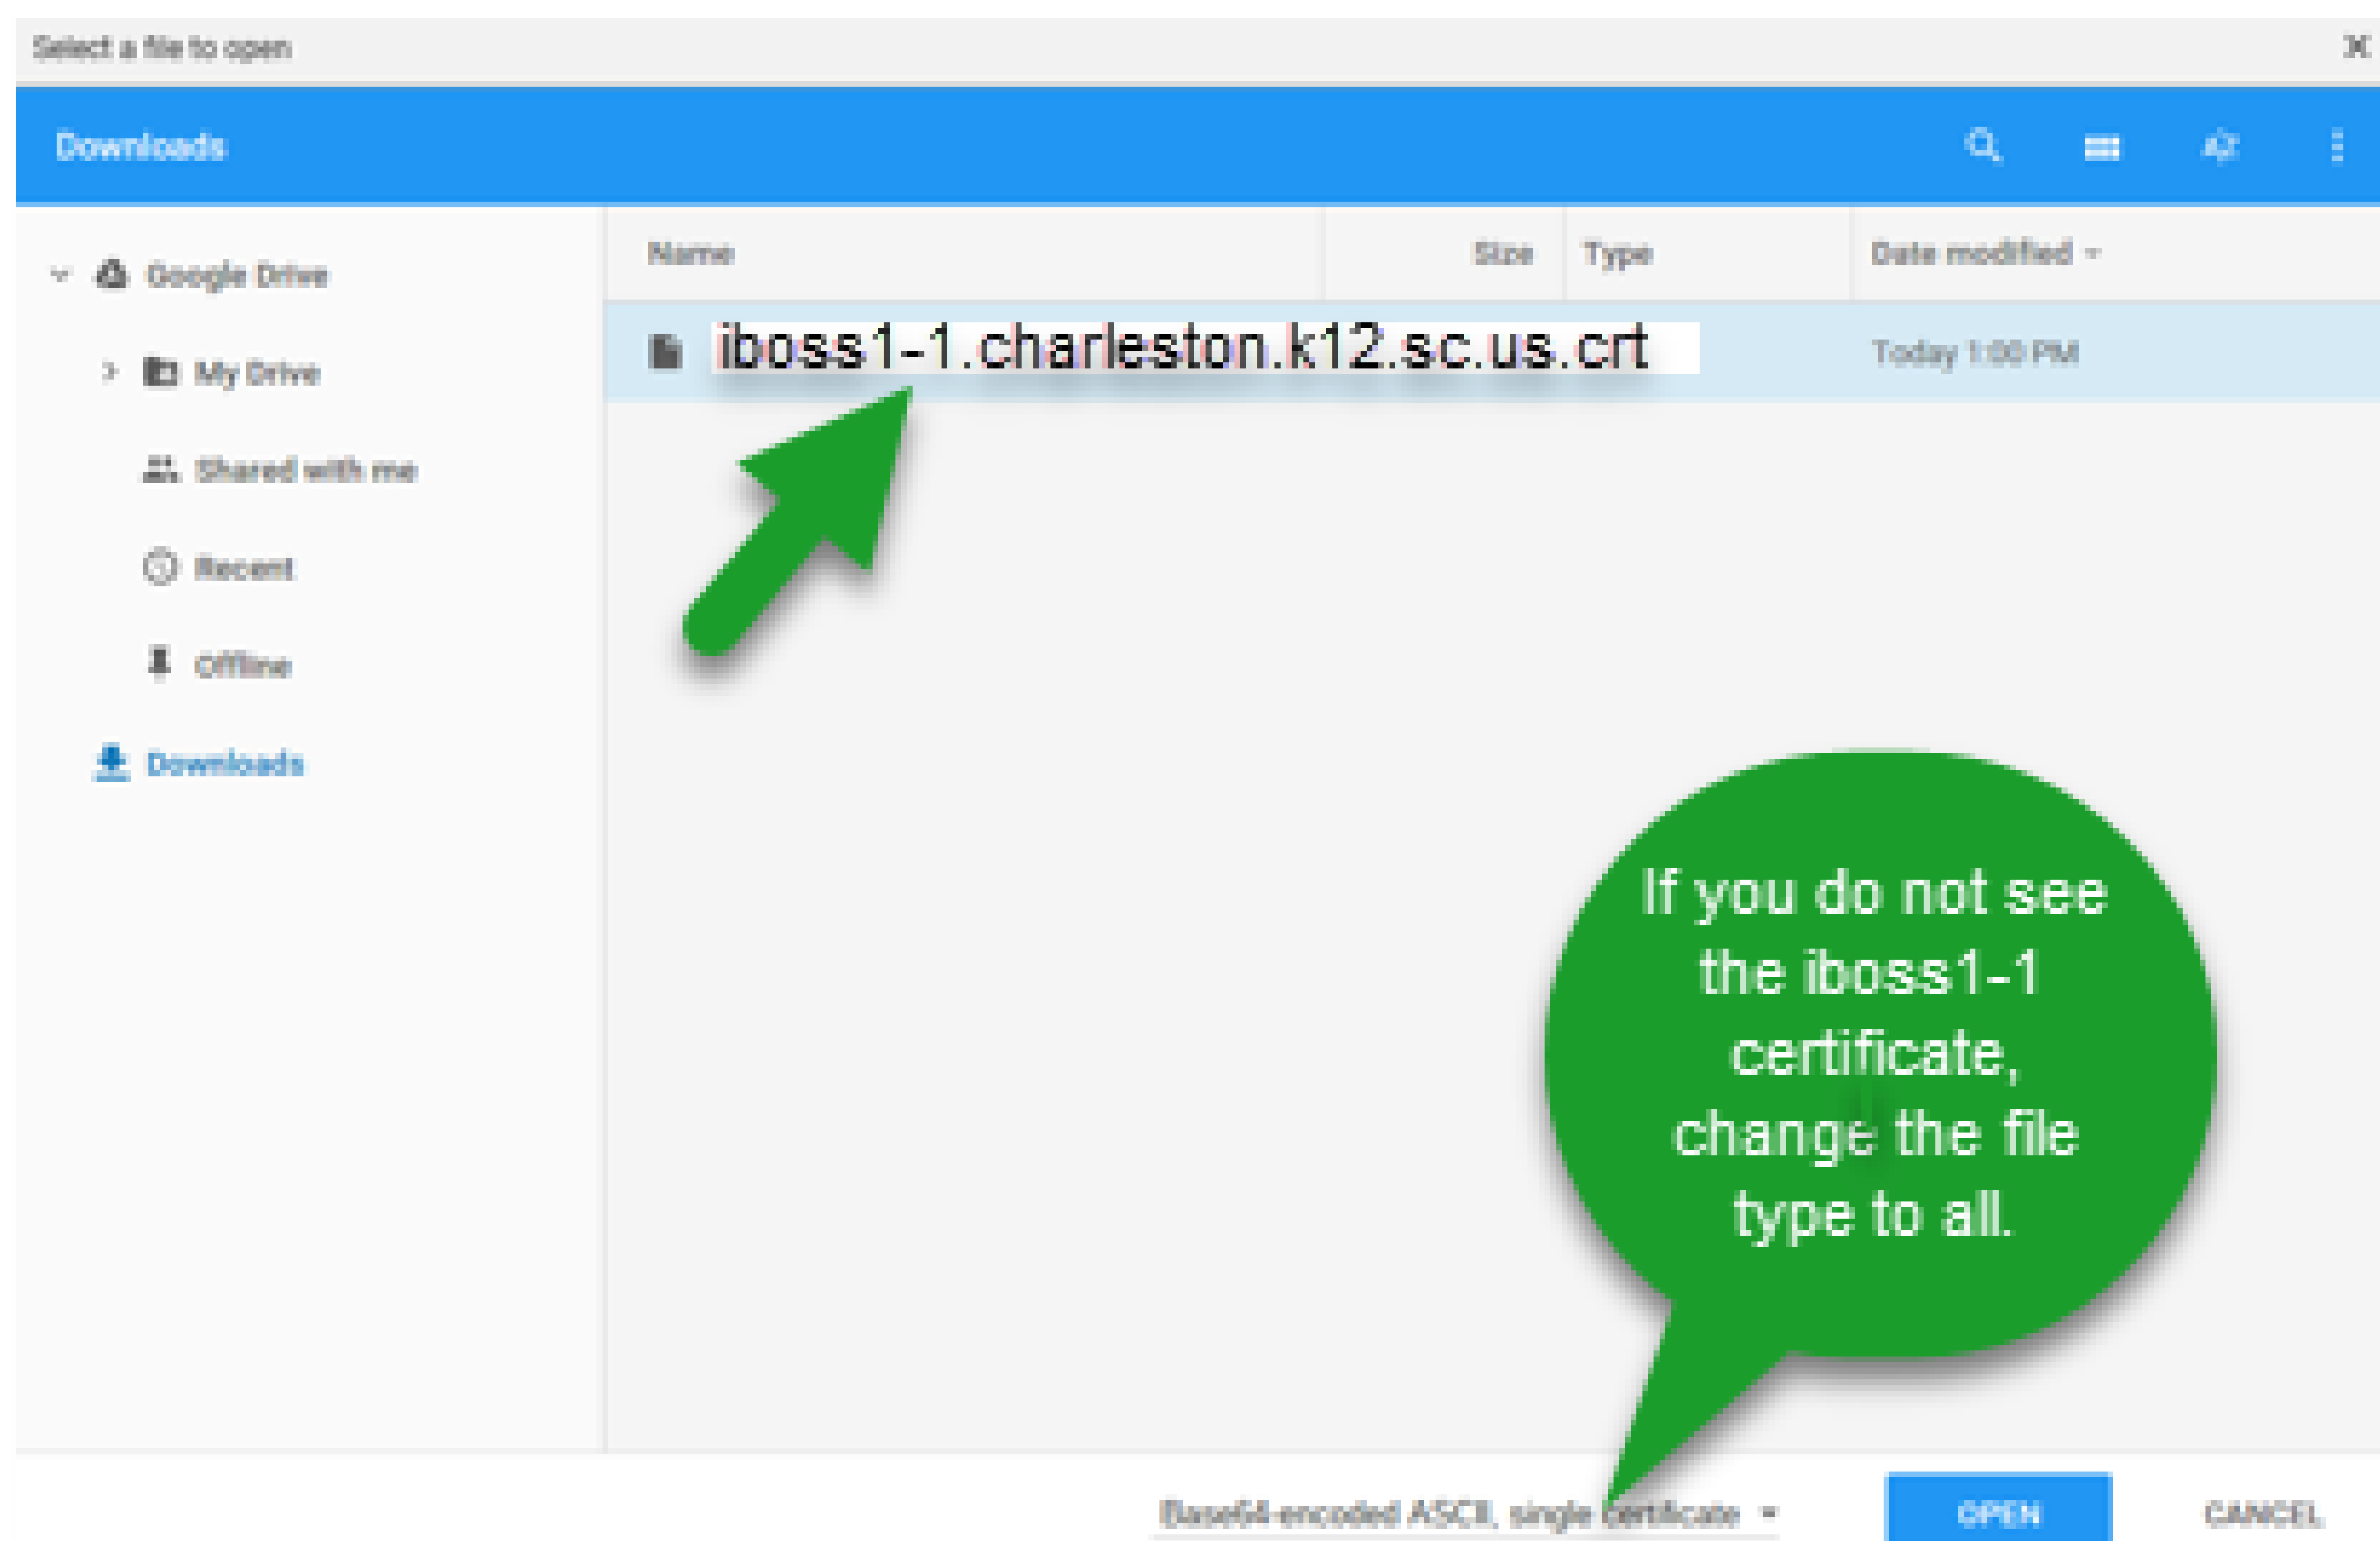

Step 8: The Settings page will expand to reveal several new options. Scroll down nearly to the bottom and click the **Manage certificates...** button

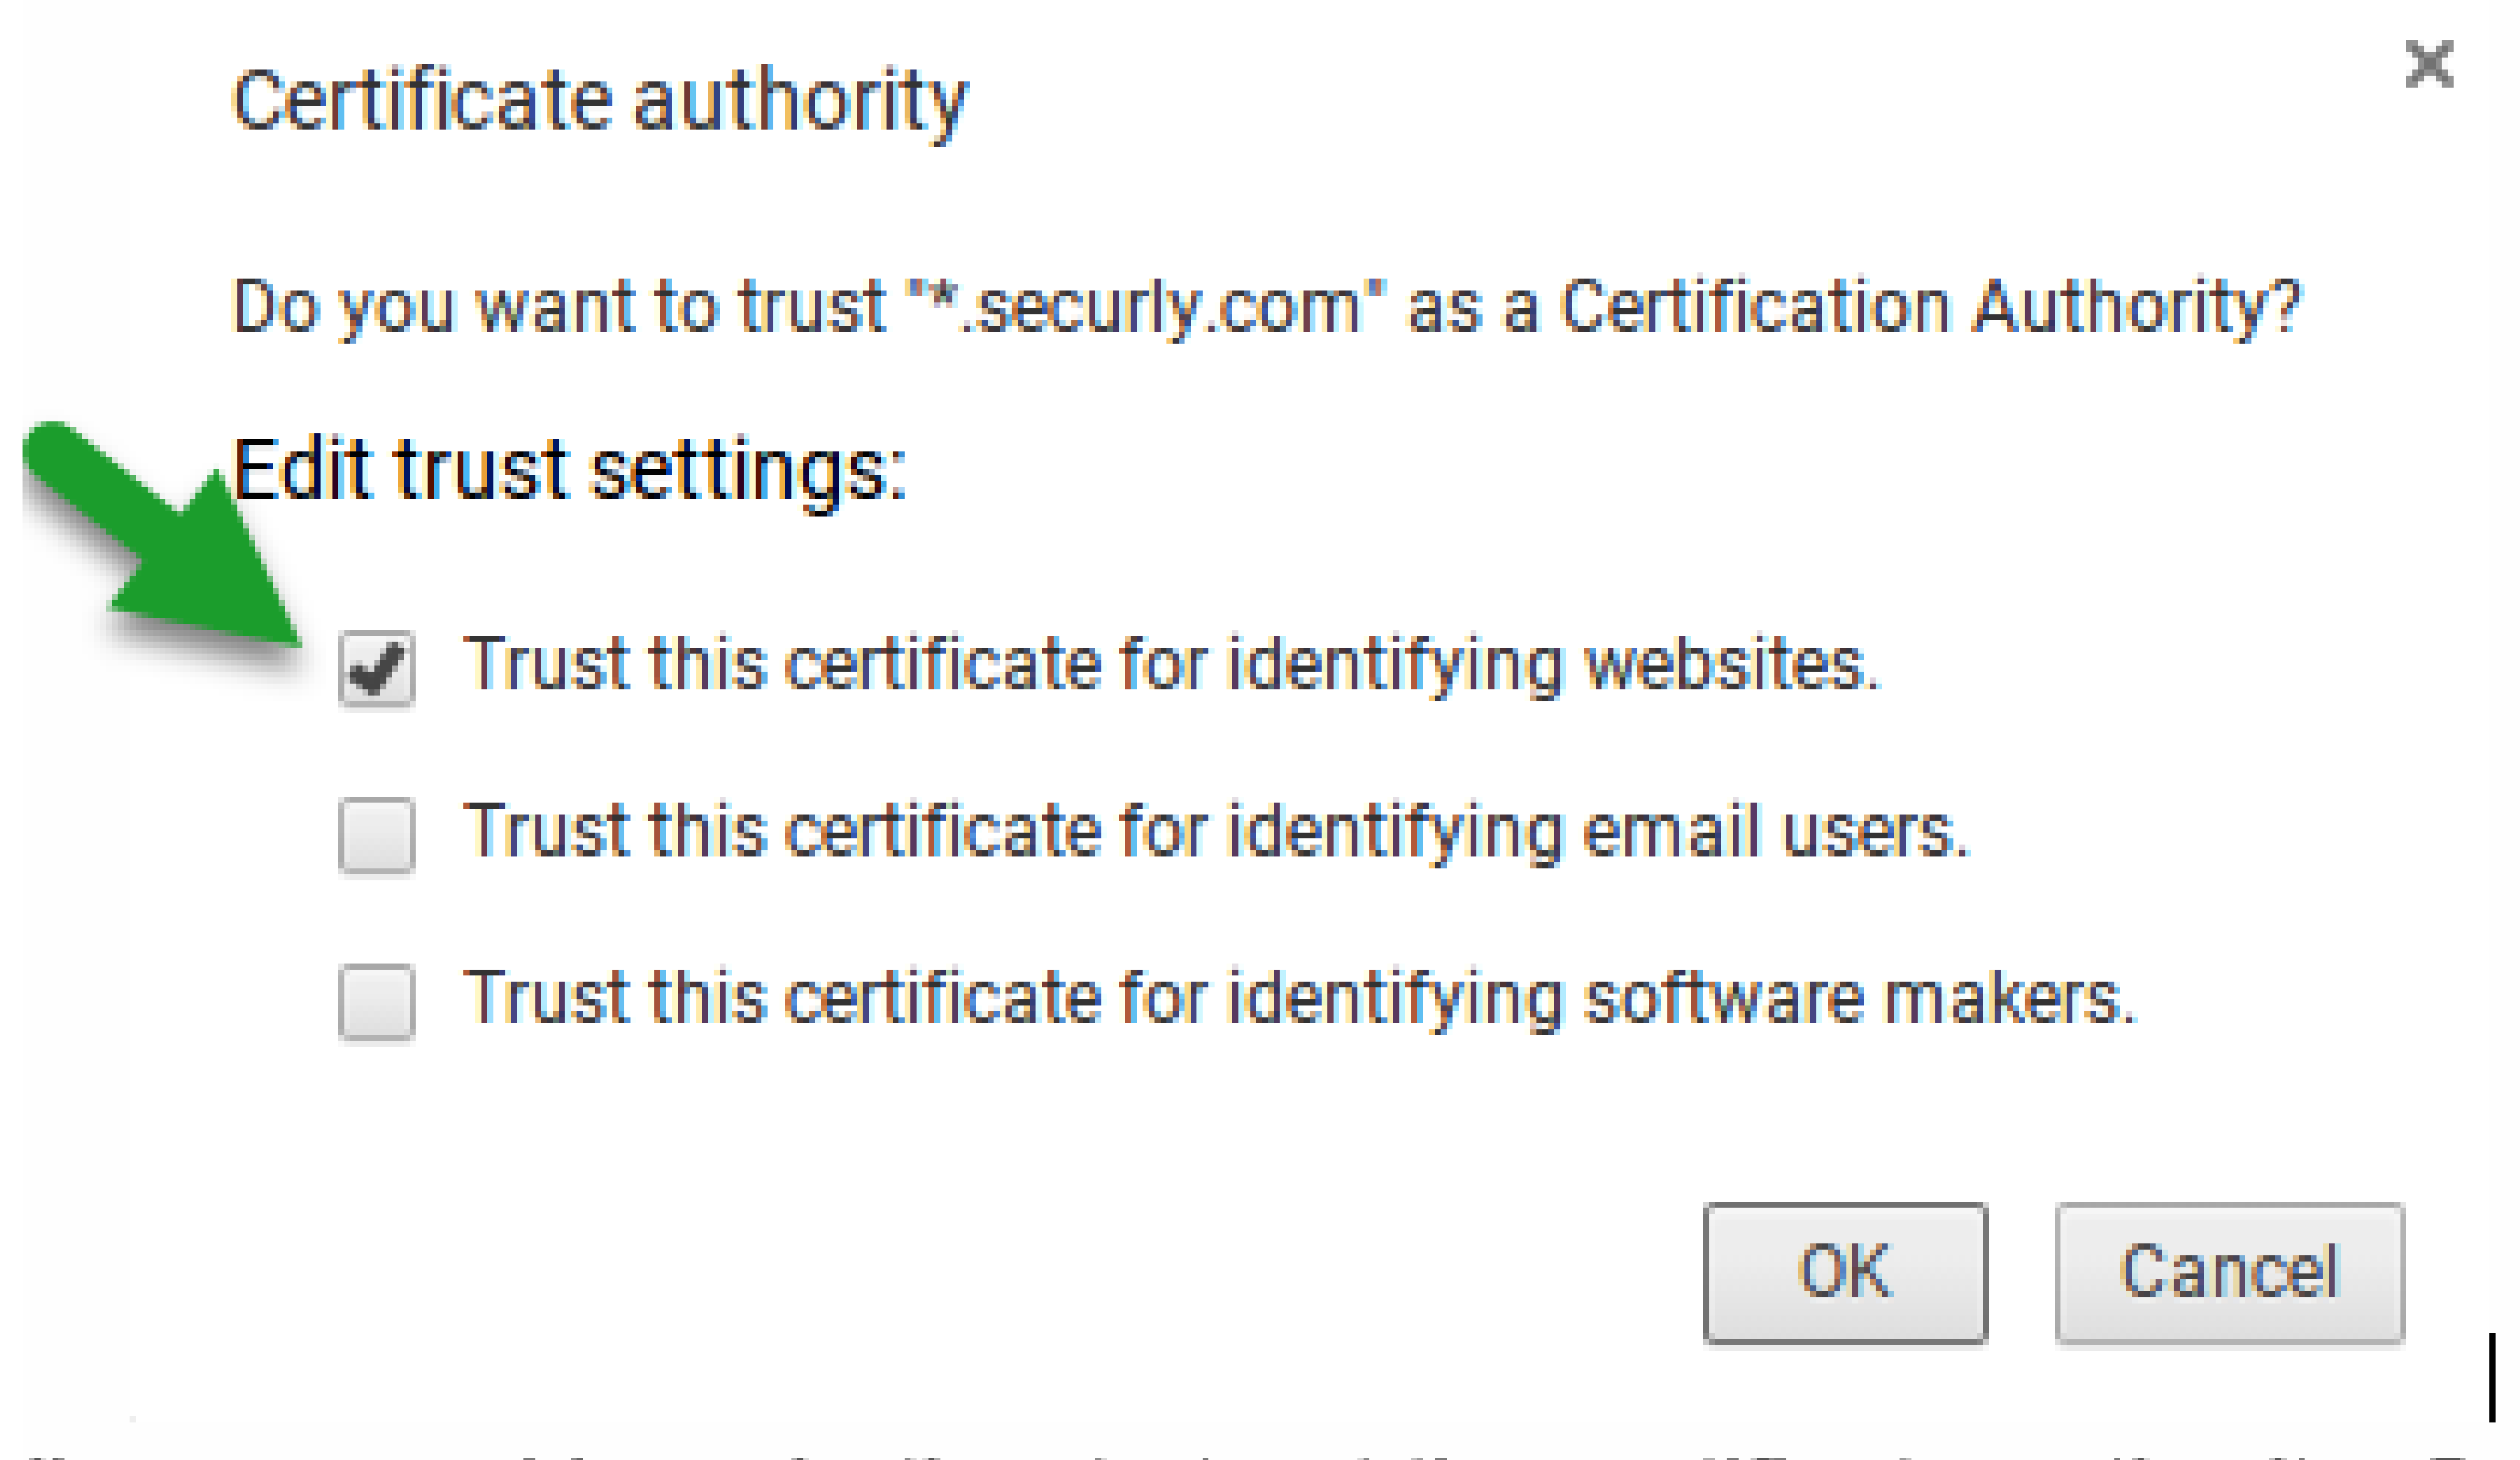

Step 9: When the Certificate manager screen appears, click the **Authorities** tab. Then, click the **Import...** button near the bottom.

Step 8: A file browser will appear, allowing you to select the certificate. Locate the certificate you downloaded previously (it may be in a folder called **Downloads**), and double-click to open it. If you do not see the **iboss1-1.charleston.k12.sc.us.crt**, please change the file option to all file types at the bottom of the screen.

Step 8: A prompt will appear asking whether to trust the certificate authority. Select **Trust this certificate for identifying websites** and then click **OK**.

Step 8: You're all done.

Have a Great Day!!
