

Tips for Middle School

1. Get Organized!

Dividers and folders are your friends! Use binders, folders, dividers, and notebooks to organize materials for every class.

2. Use your agenda!

Make sure to use your agenda! It is hard to keep up with what is due in your head! Make sure to write it down!

3. Create a study Schedule!

Have a designated area for studying and homework. Utilize flashcards and study guides to learn material.

4. Ask for help!

Your teachers, classmates, and parents can be good resources!

5. Focus on your academics!

Making good grades takes time and lots of effort! Do not wait until the last minute to complete homework and projects! Remember middle school is preparing you for high school and beyond! Develop good study habits now so that you will be successful in the future!
