

School Reopening Update- 7/29/2020

Laing Middle School of Science & Technology families-

I hope this message finds you and your family healthy and safe during this time. I would like to provide our families an update on the current school reopening plans for CCSD. Families will be given an opportunity to choose between one of two options: having their children begin school in-person and/or temporary remote learning experience, or the Virtual Academy option (9 week minimum commitment). The school district will be sending out a form this week that allows families to provide their intent for the start of the school year. I have included the CCSD Safe Restart Plan that was approved by the school board on July 27th for your review. I encourage you to read through this document as it provides, in detail, family options and answers many commonly asked questions.

If you would like your child to attend school in-person, it is important to note that our team has been working with district and medical officials to determine ways to provide a safer environment for our students and staff. This includes the installation of plexiglass barriers, separating our students at least 6 feet apart in classrooms, and the wearing of masks in the building.

We realize this is a very challenging decision for all our families, and I want you to know the staff is here to support you in making this decision. Thank you for your patience and understanding during this CRAZY time. We appreciate all your support and look forward to educating our children.

Thank you!

Jay Whitehair
Principal
